

Felipe A. Céspedes Pérez

Data Engineer

felipe.cespedes.perez@gmail.com

<https://www.linkedin.com/in/felipecp-agile-bi-etl/>

Computer Engineer with a Diploma in Project Management and Administration and a Scrum Master Professional certification. Intermediate English proficiency and extensive experience in IT roles, dedicated to the development of data extraction, transformation, and loading (ETL) solutions focused on continuous improvement, process optimization, and automation. Skilled in repository management, data flow validation, and analysis to ensure operational continuity, with a strong emphasis on agile methodologies and technical leadership.

Applied knowledge of data protection regulations and Digital Transformation frameworks within the Chilean public sector, integrating principles of privacy-by-design, interoperability, data governance, and traceability into the design of data architectures and enterprise services.

Experienced in the implementation of data anonymization and pseudonymization, risk assessments for datasets, prompts, and GenAI models, ensuring regulatory compliance, data quality, and scalability across advanced analytics, data engineering, and generative AI solutions.

Professional Experience

Accenture

Prompt Engineering, BHP — November, 2024

- Design and optimization of language model prompts. Developed advanced tools based on multi-agent logic, embeddings similarity analysis, and intelligent automation workflows integrating AI for complex task resolution.

Gen AI — Agosto, 2024 – a la fecha

- Participated in the creation of functional demos and Proof of Concept (PoC) projects addressing real client use cases, delivering innovative and impactful solutions.
- Designed and delivered specialized GenAI training sessions, covering foundational and practical concepts such as embeddings, vectorization, metric distances, chunking, prompting, and indexing techniques.
- Participated in local GenAI Hackathons, focused on developing practical AI solutions for real-world industry challenges.

Tech Stack: GitLab, Python, LangChain, LangGraph, LangSmith, Tavily, OpenAI.

Master Data Management (MDM), BHP — January, 2024 – Present

- Reverse-engineered legacy systems and performed exhaustive data model analysis. Identified data inconsistencies, optimized existing processes, and proposed correction plans to improve data integrity and MDM efficiency.

Tech Stack: GitLab, Informatica Developer, MDM Hub, SQL Server, Snowflake, DBT, StreamSets.

Data Engineer Specialist, Enel Perú — September, 2023 – a December, 2023

- Performed data integration, modeling, query optimization, and dashboard creation for operational analytics and continuous improvement.

Tech Stack: Python, Redshift, Power BI.

Data Engineer Specialist, AMSA — August, 2022 – August, 2023

- Developed and optimized data pipelines under agile methodologies. Conducted process analysis, data modeling, and dashboard development for multiple business projects.

Tech Stack: Spark SQL, Scala, Python, Azure (Databricks, Synapse), Power BI.

Freelance Consultant AFC (Chile Unemployment Insurance), Data Engineer

Etapas 1 — April 2020 - November 2020 / Etapas 2 — March 2021 - November 2021

- Led data extraction, validation, and automation processes for employer/affiliate notifications related to labor suspension law implementation.
- Designed and implemented data architectures aligned with client needs and automated operational workflows, reducing manual effort and cost.

Key Achievements:

- ✓ On-time delivery of the first mass notification process.
- ✓ Migrated Masterbase notifications to autonomous Python workflows, reducing costs and processing time.
- ✓ Built weekly and historical reporting dashboards for sent notifications.

Tech Stack: Pentaho, Jenkins, Python, PHP, Zoho, Redmine, JavaScript.

Orbis Data

Data Engineer, Sinacofi — February, 2022 – July, 2022

- Process analysis, effort estimation, data migration, and documentation.

Tech Stack: PowerCenter, Python, Linux, Shell Script.

Consultor Senior, LATAM Airlines — December, 2017 – February, 2022

- Migrated data processes to the Google Cloud Platform (GCP).
- Managed and analyzed marketing and loyalty data.
- Automated storage distribution alerts and coordinated internal stakeholder requirements.
- Delivered agile methodology training to the marketing area (12 participants).

Tech Stack: GCP (BigQuery, Storage, Composer, Airflow), Salesforce, Teradata, Responsys, Jenkins, JavaScript.

SAT Falabella Project

Argentina Phase 2 — January 2017 – December 2017 / Colombia Phase 1 — June 2016 – December 2017

- Led data modeling, integration of core banking systems, and creation of operational data stores (ODS).
- Provided coaching to high-performance teams and ensured project implementation with pre-production testing.

Tech Stack: PowerCenter, Oracle, SQL Server, Flexcube, Cobol, Linux, Control-M, Data Warehouse, JavaScript.

Kibernum

Process Analyst — August, 2015 – March 2016

- Process metrics, productivity modeling, and continuous improvement initiatives.

Tech Stack: PowerCenter, Control-M, Linux, Shell Script.

Hewlett Packard HP, ITO Service Delivery Rep II — December, 2010 – January 2015

- Monitored production data workflows, automated reconciliation processes, and developed control scripts for daily operations.

Tech Stack: Workload Automation, VAX VMS, Unix, Tandem, Windows, Linux, Oracle, SQL Server, SSIS.

BCI Bank – Systems Administrator — August 2008 - September 2010

- Second-level support for production systems, process recovery scripting, and system batch management.

Tech Stack: VAX VMS, Unix, Tandem, IBM, OnDemand, Legato, Shell Script, Control-M.

Transbank – Systems Operator — November 2006 - August 2008

- Monitored transaction systems, analyzed performance, and managed Oracle 9i database queries.

Tech Stack: VAX VMS, Unix, Tandem, Prognosis, Oracle, SQL Server, Linux, Shell Script, AWK, Batch Script.

TECHNICAL SKILLS

Category	Level / Tools & Technologies	Category	Level / Tools & Technologies
Programming Languages	Intermediate: Python, PySpark, Shell Script, JavaScript, PHP, HTML	Visualización y BI	Power BI, Tableau, Grafana
AI & Data Frameworks	LangChain, LangGraph, LangSmith, OpenAI API, Tavily, Pandas, NumPy, Scikit-learn	Data Processing	Spark SQL, Scala, Redshift, MDM Hub
ETL / Orchestration Tools	Advanced: Pentaho Data Integration, Informatica PowerCenter Intermediate: Airflow, Jenkins, Control-M, SSIS, StreamSets, DBT	Cloud & Big Data	Google Cloud Platform (GCP): BigQuery, Composer, Storage, Data Lake Microsoft Azure: Databricks, Synapse, DevOps, Data Lake, Storage, App Service, Cosmos, OpenAI Service
Cloud & Big Data	Git, GitLab, GitHub, Azure DevOps	Methodologies	Scrum, Kanban, Lean, ITIL, Six Sigma
Databases	Avanzado: SQL Server, Teradata, Cosmos, Redis Intermedio: Oracle, PostgreSQL, MySQL, Snowflake	Languages	Conversational: Inglés Native: Español

EDUCATION

Pontificia Universidad Católica de Chile – Santiago. Diploma in Project Management, 2018
Universidad Tecnológica de Chile – Santiago. Computer Engineering, 2013
